

K R I S T I N A G J O Z E V

F R O N T - E N D D E V E L O P E R

Results-oriented front-end developer dedicated to creating and optimizing user-friendly, interactive, and feature-rich web and mobile applications. Strong attention to detail complemented with a passion to deliver original and efficient web solutions, and expertise in JavaScript, React, Redux, RESTful API's, HTML, CSS, Bootstrap, Photoshop.

E X P E R I E N C E

● FREELANCE FRONT-END DEVELOPER

San Francisco, California | February 2020 - present

- Built multiple responsive web applications that contain dynamic content using JavaScript, React, RESTful API's while collaborating with other developers through a Scrum framework.
- Implemented end-to-end payment solutions for great user experience and business growth using PayPal Commerce Platform API's.
- Created a new functionality enabling the customer to send emails directly to the client's inbox using SMTP server and EmailJS.
- Developed React components based on designs created in Figma collaborative interface tool.

● FRONT-END DEVELOPER (CONTRACT)

Groupmuse - San Francisco, CA | July 2019 - January 2020

- Developed new testable, user-facing form components for the web app to allow users to become event hosts using React and Enzyme while storing the state in Redux.
- Refactored the mobile app while reusing fast-rendering React Native components and performed code cleanup enabling the team to quickly iterate over new features.
- Actively worked with a team of six developers by pair programming and collaborating in a fast-paced Agile environment.

● BOOTCAMP GRADUATE

Rithm School - San Francisco, CA | March 2019 - July 2019

- Completed daily challenges and weekly projects in a test-driven full-stack development setting using JavaScript, React, Redux, Node.js, Express, Python, Flask and PostgreSQL.
- Over the course of 4 months completed over 80 coding assignments independently and through pair programming while using GitHub in a collaborative Agile development environment.
- Learned tools and techniques by building interactive web applications through solo and group projects by designing and implementing RESTful APIs using Node and Express.js.

● FRONT-END DEVELOPER

Semos Cloud - Skopje, Macedonia | April 2017 - September 2018

- Maintained and modified existing code of a full-stack web application, with an emphasis on responsive design and cross-browser compatibility using JavaScript, HTML, CSS and Bootstrap.
- Supported and optimized critical company website content, including quick view, and the product portals, using React components which improved page rendering on different devices.
- Identified opportunities and facilitated the implementation and continuous improvement of the web application reliability and latency while working with the design and product teams.

P R O J E C T S

● RESTAURANTS FINDER | October 2019 | [Restaurants Finder](#)

React, JavaScript, Zomato RESTful API's, Enzyme, Git, HTML, CSS/Bootstrap

- Built own web application using Zomato RESTful API's that enables users to find local restaurants by different cuisine using React and JavaScript.
- Implemented Bootstrap library to have clean, modern and organized responsive design.
- Used Enzyme testing utility to make assertions about the output and behavior of React components.

● JOBLY | June 2019 | [Jobly](#)

React, JavaScript, Node.js, Express, PostgreSQL, Git, HTML, CSS/Bootstrap

- Worked on a full-stack application which aggregated job postings using a PostgreSQL database.
- Used React Components to split the UI into independent, reusable pieces, and think about each piece in isolation.
- Created RESTful API's using Express and applied standard unit-testing practices, to ensure renders, redirects, and database CRUD operations functioned correctly.
